

Results Based Approaches for Financing Education

Jaime Saavedra
Education World Forum
London, January 2019

3 Messages

1

Investment in education has increased, but most countries have to mobilize much more resources and use those resources effectively.

2

Effective spending is not a matter of funding inputs. Inputs, outputs and programs have to be clearly linked to outcomes.

3

To ensure investments in education deliver value (learning) for money, we need performance metrics of how well the system is delivering quality.

High Income Countries

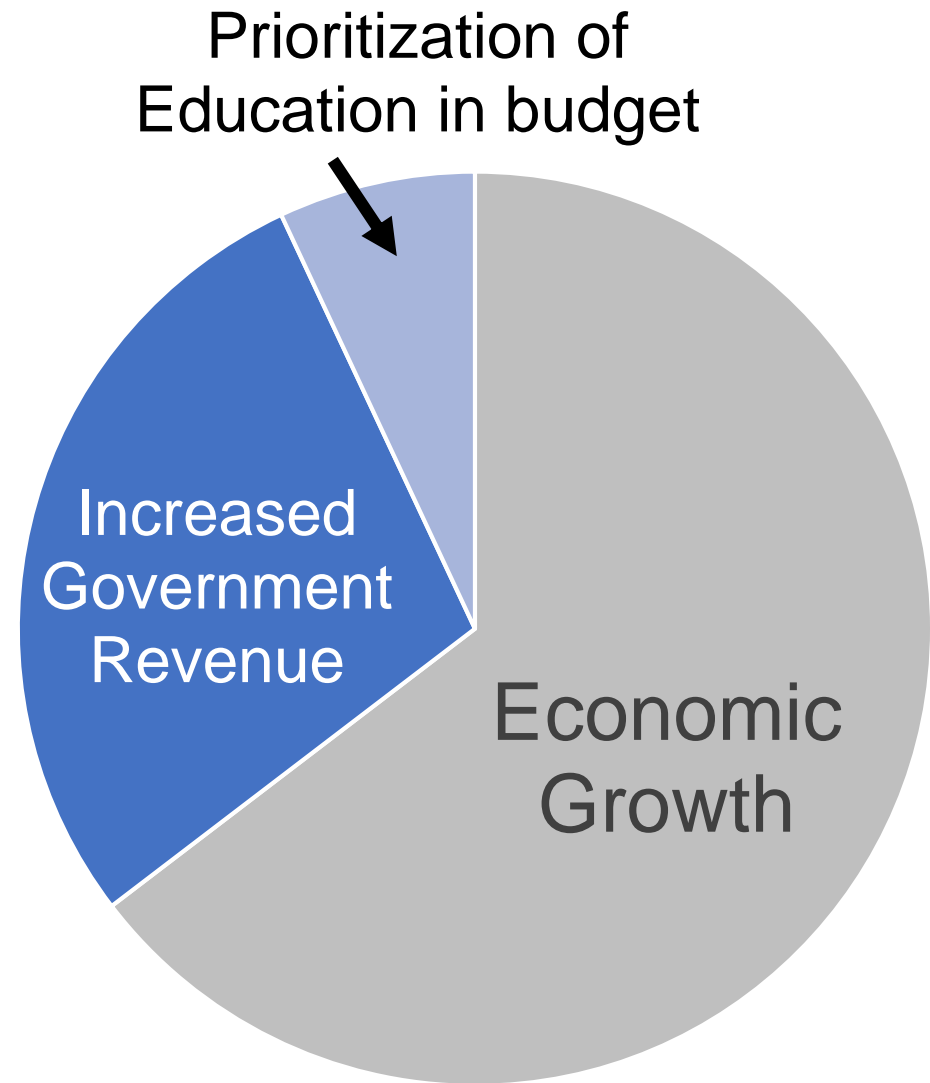

Low Income Countries

Economic growth
has been the key
driver of increased
expenditures

Low Income Countries

Furthermore, the \$188
are not being well
spent

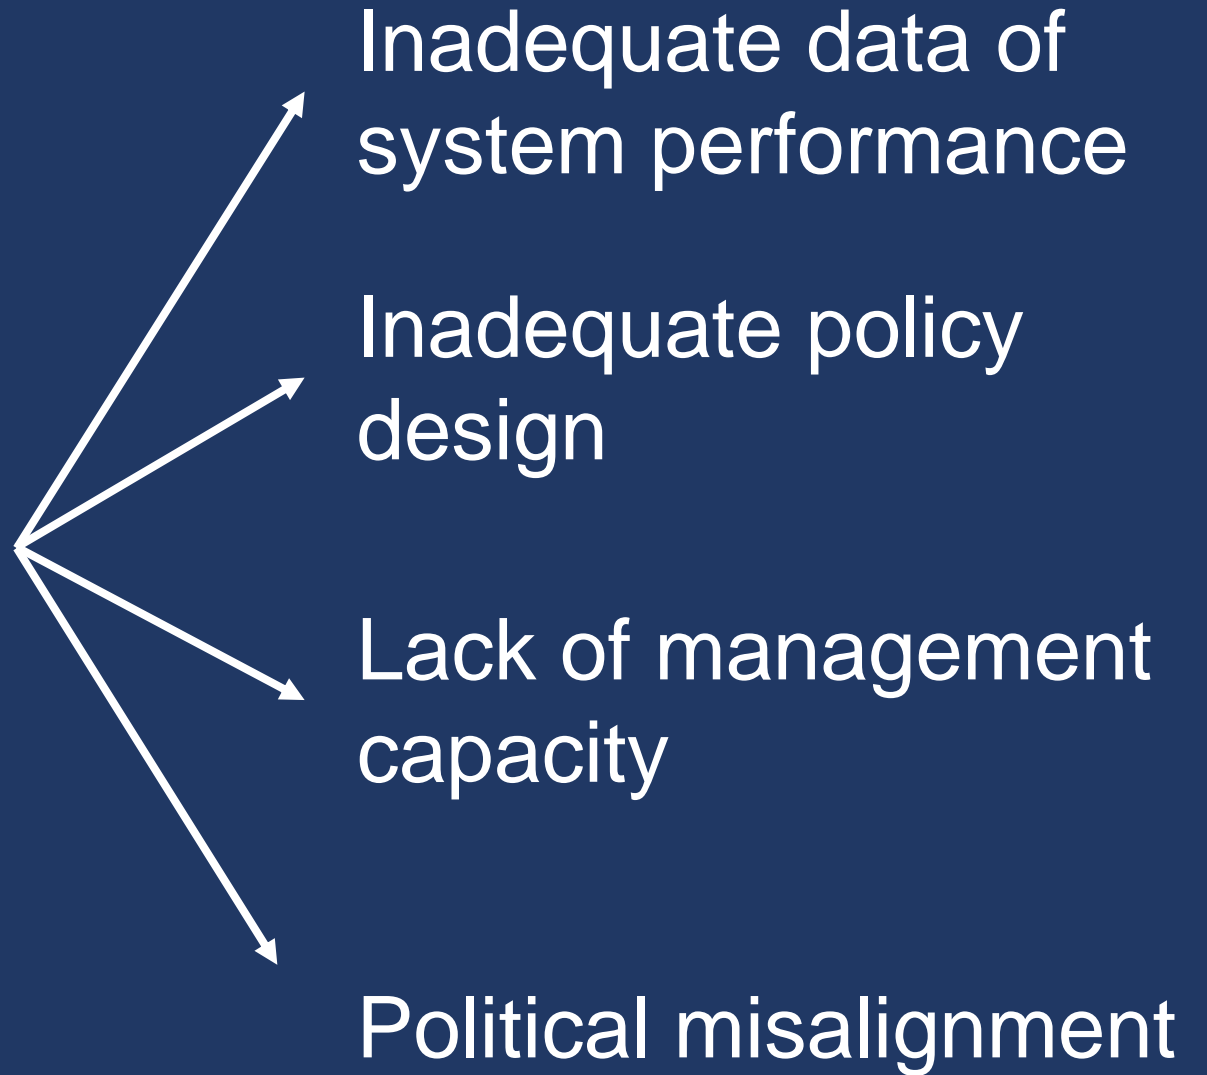

Ways in which funding is ineffective

Spending on
the wrong
things

Funds don't
reach
schools or
not used as
intended

Unequal
spending

**Why is this
happening?**

Results Based Financing

Traditional approach

Learning

RBF approach

Inputs

Learning

77%

Education commitments 2018

At the Government level

- Leverage systemic change
- Funders/Institutions aligned with same objective
- Monitoring and evaluation

Incentivizing other education actors

- Incentivize behavioral change of key actors
- Link behavior to specific outcomes
- Need to be pragmatic
